

# Platteview Solar

All together, AES and Omaha Public Power District are bringing 81 MW of clean energy to Nebraska customers and supporting OPPD's goal of being a net-zero carbon producer by 2050.

AES' Platteview Solar project is a solar facility located on privately owned land in Saunders County, Nebraska. This project is doubling Nebraska's current solar energy impact while creating environmental and economic benefits for local communities.

This also represents OPPD's first utility-scale solar power purchase agreement, helping the utility continue to diversify its energy portfolio and add more renewable energy.

## Project details:

- Location: **Saunders County, Nebraska**
- Nameplate system size: **81 MWac**
- Acreage: **Uses approximately 500 acres south of Hwy 92 near Yutan, Nebraska**
- Installation type: **Photovoltaic solar arrays with single-axis tracker**
- Construction start: **Spring 2023**
- Commercial operation date: **May 2024**

## Project goals and benefits

The Platteview Solar project provides a unique opportunity for a low-impact, high-value economic development in the county:

- Estimated total investment of \$57 million
- Created 350+ jobs during peak construction
- 2-3 full-time employees will operate and maintain the project
- Enough clean energy to power 14,000 homes throughout the OPPD territory

Platteview Solar will generate more than \$300,000 in local taxes per year over the life of the project. The Yutan School District will receive over \$200,000 of the tax revenue.

## About OPPD

Omaha Public Power District is a publicly owned electric utility, serving an estimated population of 885,000 people. While its headquarters is located in Omaha, the utility serves 13 counties within a 5,000-square-mile southeast Nebraska footprint. OPPD's mission is to provide affordable, reliable and environmentally sensitive energy services to our customers.
